

Safe removal of contaminated gloves

Pull glove by the cuff from your wrist towards your finger tips until the glove folds over

Carefully grab the fold and pull towards your finger tips. As you pull you are turning the inside of the glove outwards.

Pull the fold until the glove is off

To avoid contamination of your fingers, continue to hold the removed glove and use it in order to take off the other one. Repeat from 1 to 3.

Encase the first glove into the other
